

AKKU-Pack Rechargeable Battery from Limoss

AKKU-PACK rechargeable

The Limoss AKKU-PACK gives you the ability to place your furniture anywhere you please without the worry of cables or plugins. This revolutionary battery pack is longer lasting and more compact than any other product on the market today. While traditional battery packs are capable of only 25-50 cycles per charge; the Limoss AKKU-PACK can handle up to 300 cycles on a single charge. To simplify the installation and reduce cost, we have also designed this battery pack to be recharged using any existing Limoss transformer. No need to purchase a separate transformer as most battery packs require.

Installation Rechargeable Battery from Limoss Relax Collection

Lift up the back skirt on the back of your Swing Relaxer or Wall Saver sofa.

Unhook the direct power cable from the motor behind the seat.

Battery snaps onto the empty plate.

Unsnap clip to free up wire.

Connect free wire to battery and you have battery power.
