It is only the imagination that sets the limit for model Handy

DANISH FURNITURE CRAFTS ANNO 1962

Handy, is Denmark's first modular sofa system manufactured intermittently since 1962.

Handy is today a classic which, through more than 58 years of development and experience, appears as a modern and timeless sofa system. The combination of strict quality requirements and the best Danish handicraft traditions performed by i.a. seamstress, carpenters, and upholsterers result in a unique piece of furniture, where you can enjoy the good Danish craftsmanship and beautiful design every day.

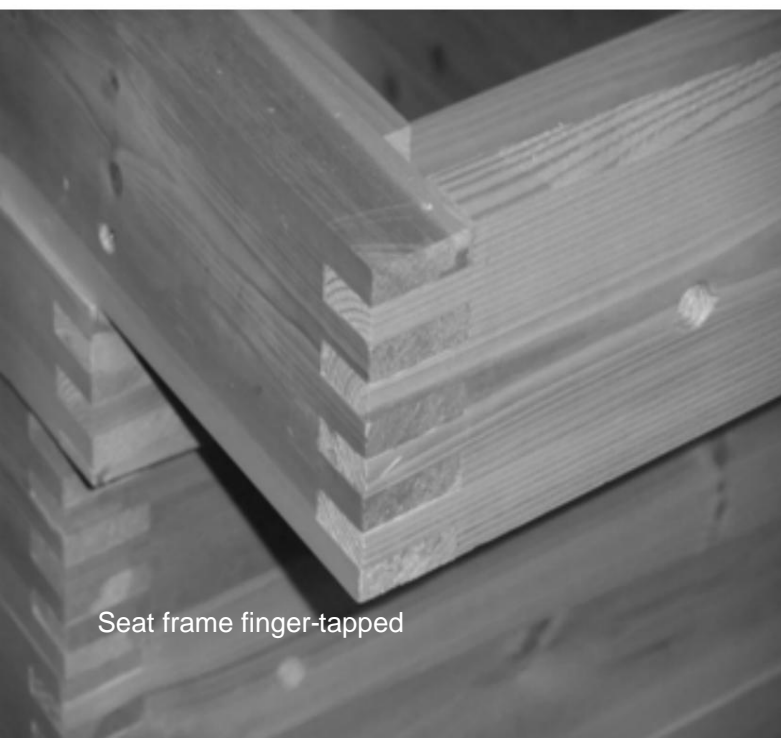

All arms are mounted with 2 cm. fixed Setex on top of the arm so that it provides good comfort reduces wear and keeps the shape for many years to come.

6 different headboards 5
different arm cushions
Legs round or square indented or in arm.
Round / Square leg + 3 cm + extension
Co-chrome thin - wide + extension
Medium wide stainless brushed steel + extension
Mede Walnut - Oak + supplement
H90 + supplement

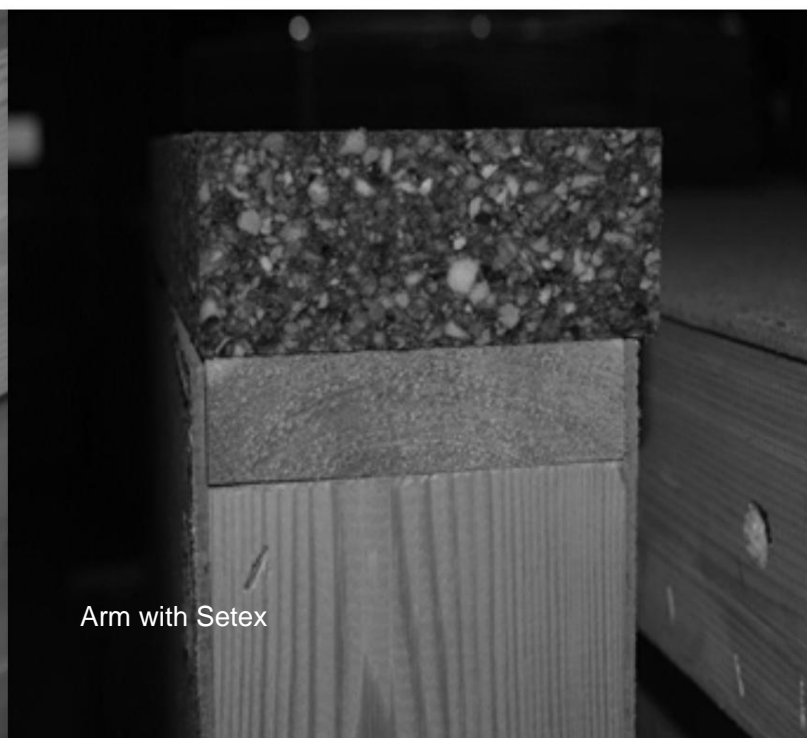

Seat cushion standard Pantera Origin Bio foam / Supplement duntop (Nortex)

Back cushion standard cassette-divided polydun (Nortex) or cold foam

Pantera Origin Bio foam is specially developed for long-lasting comfort. The material has very open cells in the structure which provides excellent air ventilation while maintaining a perfect comfort in the sofa and is better for our environment.

Seat frame finger-tapped

Arm with Setex

MATERIALS - SEAT CUSHIONS

Pantera is a top product that is specially developed for high quality products on the market. Pantera scores high on all the important parameters of comfort foam. It stands out through its durability, consistent quality and high comfort.

The dimensional stability of this top product is extraordinary, which is why we offer a 7-year warranty for normal use. In addition, Pantera California brand meets requirements 117A and D as standard with no additional additions, thereby maintaining optimal comfort Pantera Origin Bio foam.

Pantera is a top product that uses renewable resources. This means that Pantera Origin has a smaller footprint in our nature. Pantera Origin is the first step towards achieving our vision of a new generation of sustainable foams, with more renewable materials and less dependence on the chemical industry. We work with a number of international partners to exploit the potential of natural oilseeds.

- Comfortable
- Durable; 7 years quality guarantee
- Elastic
- Ventilating
- Fire retardant
- Small tolerances on firmness
- Human friendly
- Full body support

Nielaus has been using Pantera for more than 25 years.

MATERIALS - BACK & SEAT PILLOWS

Quality does not come by itself.

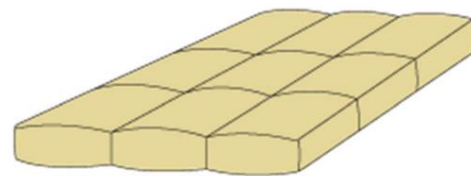

At Nortex A / S, you enter a downy universe that dates back to 1936. It was the year in which the 3,000 m² factory was built at the Port of Odense, with the purpose of manufacturing products related to feathers and down. Since then, we have purposefully specialized in pillows of the highest quality, and has continuously developed and refined our products according to the wishes of the Danes and taste. Today we have an enormous and unique knowledge of down and feathers as stuffing in pillows, and still hold stuck in the proud Danish craftsmanship traditions, which create the very best products.

How does Nortex A / S view animal welfare?

We take animal welfare very seriously and use only down from slaughtered European animals that are already part of the food industry.

SQUARE BACK PILLOW

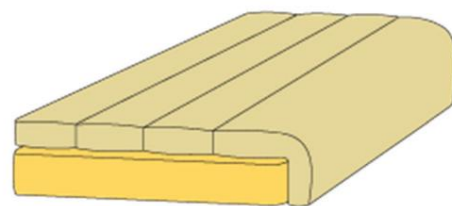

Mostly used for seat and back. The transverse channels hold on to the filling so that it stays where it is shall. This type of pillow is more dimensionally stable than the channel pillow.

Kvadratpude

DUNTOP

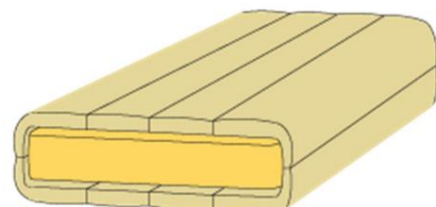

Seat cushion with foam core at the bottom. The construction ensures a very dimensionally stable cushion, which at the same time the furniture gives the comfortable look. The down top is used a lot for leather furniture, where fabric is often placed on the underside (venting).

Duntop

DUNTOP FRIENDLY

Seat cushion with foam core located centrally. It is very dimensionally stable. The type is most popular, and it is particularly suitable for upholstered furniture, as the cushion is reversible.

Overtræk/vendbar duntop

HISTORY

Nielaus is a Scandinavian design brand with a long history.

It all starts back in 1959, when Jeki Møbler A / S was founded as an upholstered furniture factory. In 1973, two employees from Jeki Møbler decide to start their own company and found the company Nielaus Møbler ApS.

The company's distinctive name, Nielaus, is immediately associated by many with German sounds, but in reality it is only parts of the founders' surnames, Nielsen and Lauersen, that have been put together into a new word.

In 1981 the current owners take over the company, and in 1998 Nielaus Møbler ApS and Jeki Møbler A / S are merged. A few years later, it was decided to market the entire collection under the brand Nielaus.

The story of Nielaus Møbler is the story of a number of small furniture factories, which over time become one - e.g. Jeki Møbler, Lindebjerg Møbelfabrik, Holstebro Møbelfabrik and AP Dreamseat. They all have a place in the history of the company, in its proud design and craft traditions and in the high quality that Nielaus stands for today. The company employs approx. 30 employees, all of whom interpret the Nielaus coal trip and the history of furniture manufacturing in the finest way.

WHEN ONLY THE BEST IS GOOD ENOUGH

Nielaus has developed a furniture series that is not just furniture you sit in - it is furniture you live with. To achieve that goal, nothing must be left to chance, neither in material selection nor in the manufacturing process.

Our consistent focus on quality and design, combined with the best Danish craft traditions, is carried out, among other things. seamstress, carpenters, and upholsterers, results in a unique piece of furniture where you can enjoy the good craftsmanship and beautiful design every day. Visit one of our dealers, get a personal demonstration and experience real 100% Danish Nielaus's quality.

As one of the only Danish upholstery furniture manufacturers, Nielaus has made the crucial decision to keep the production of furniture in Denmark. This means that throughout the manufacturing process - from design to finished product - we can pursue a targeted policy that puts environmental protection's vision and sustainability at the forefront. We would very much like to make our contribution to a better everyday life for both employees and subcontractors as well as customers.

For us, sustainability is also about quality. By consistently using materials of the best quality, which are processed in a carefully controlled manufacturing process, we have created a furniture series with a long service life.

The majority of our subcontractors are Danish, and home transport of raw materials such as frames, foam, wood, steel, etc. therefore only has a minimal effect on the climate.

100% Made in Denmark also means that our furniture series are not transported half the globe around in containers to end up in Danish shops or commercial establishments. We believe that everyone is best served by a local production that protects the environment as much as possible. 90% of our customers are thus within a radius of 300 km from the factory in Denmark.

FACTS about selected raw materials:

FOAM: The polyurethane foam we use is made with water vapor and is free of CFCs. Nielaus' PA-Origin Bio foam is manufactured according to the strictest environmental requirements and can be recycled.

ADHESIVE: Most of the glue we use is water-based.

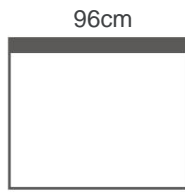

LEATHER: No solvents have been used to dye our leather grades. For the past 12 years, Nielaus has worked exclusively with tanneries, which have made a sharp reduction in the chromium content during tanning.

FABRIC: We allow the choice of textiles that have the environmental certificates EU-Blomsten DK / 16/20 and Økø-TEX Standard 100-6234-4401.
